

Test Plan

Phase 0 → Phase 3

Everything built so far, laid out as a checklist for an independent tester — in the order it should be tested.

Panel **radian-admin.vercel.app**

Scope **Administration · Masters · Items · Purchase · Inventory · Shop-wide settings**

Checks **170+ numbered steps across 10 sections**

Version **1.0 — 22 August 2026**

0. BEFORE YOU START

0.1 What you are testing

The Radian admin panel (the shop's back office) on the **demo** deployment. Nothing here touches real customers or real money.

PART	ADDRESS
Admin panel — this is what you test	https://radian-admin.vercel.app
Storefront (customer site) — only for two checks	https://radian-web-tan.vercel.app

Login details are sent to you separately. Do not share them.

0.2 Rules for the tester

1. **The API sleeps.** The first page after a quiet spell can take **30-50 seconds**. Wait a full minute before calling anything broken.
2. **Test in the order written.** Later sections use data created earlier (an item is needed before a purchase; a purchase before stock).
3. **Report like this:** screen → what you did → what you expected → what happened → screenshot. One row per problem.
4. Mark every check **PASS / FAIL / N-A**. If a step is blocked by an earlier failure, write BLOCKED and move on.
5. **Do not** delete other people's test rows unless a step says to.
6. Watch for these four things everywhere, even when a step does not mention them:
 - a number that does not add up
 - a screen that jumps, flickers or scrolls by itself after saving
 - text in **Bangla** anywhere in the panel (there must be none)
 - **paisa** being dropped (type 19.80 → it must stay 19.80, never 19)

0.3 Vocabulary

WORD	MEANING
Item	a thing the shop holds in stock (a rose, a teddy, wrapping paper)
Product	a thing the website sells; it points at exactly one Item
Warehouse / store	a place stock sits: <i>Radian Shop, Main Storeroom</i>
POS / counter	selling face to face at the shop
Ledger	the running record of every stock or money movement
AVCO	average cost — what the shop paid on average for one unit

1. PHASE 0 — BASELINE AND HOUSEKEEPING

What was built: the demo database was emptied down to configuration only, and every "sample data" pour was removed from the code (fake products, fake staff, fake suppliers).

Checklist 1 — no invented data anywhere

#	STEP	EXPECTED	P/F
1.1	Open the panel; log in	Dashboard loads, no error banner	☐
1.2	Visit Items → All items, Suppliers, Purchases, Inventory → Stock board	Only rows a human created. No "Sample", "Demo", "Lorem", "Test supplier 1" style rows that nobody made	☐
1.3	Look for buttons like "Add the usual categories" / "Load sample data"	None exist	☐
1.4	Anywhere a list is empty	It says so plainly; it never invents rows to look busy	☐
1.5	Whole panel: any Bangla text on screen?	None. English only	☐

2. PHASE 1 — ADMINISTRATION (access, people, company, backup)

What was built: who may open which screen, invitations, the guard that enforces it, one notification bell, company details, backup.

Screens: [Setup](#) → [Administration](#) → Overview · Access control · People & accounts · Activity & sessions · Company settings · All settings · Backup & restore · Integrations & keys.

Checklist 2A — access templates

#	STEP	EXPECTED	P/F
2.1	Administration → Access control	Templates list (OWNER / MANAGER / STAFF style rows)	☐
2.2	Open a template; switch a screen from Allowed to Blocked; save	Saves without the page jumping; a confirmation appears	☐
2.3	Re-open the template	The change is still there	☐
2.4	Turn a whole module to Auto	Module opens if any screen inside it is allowed	☐

Checklist 2B — people and invitations

#	STEP	EXPECTED	P/F
2.5	People & accounts → invite a new person without choosing a template	Refused — a template is required	☐
2.6	Invite with a template	A one-time link is produced; it points at the real panel address	☐
2.7	Open that link in a private window	It asks to set a password; after that it opens the panel	☐
2.8	Log in as that person	Only the allowed screens are reachable	☐
2.9	As that person, paste the URL of a blocked screen	A polite "door closed" card — NOT a wall of errors	☐

Checklist 2C — the rest

#	STEP	EXPECTED	P/F
2.10	Activity & sessions	Recent actions with who and when; history opens as a modal	☐
2.11	Company settings — fill legal name, BIN, address, signatory; save	Saves; re-open shows the values	☐

#	STEP	EXPECTED	P/F
2.12	The bell (top right, owner only)	Carries state notices — backup, invites, licence, payment sandbox. Pages themselves carry no such banners	☐
2.13	Backup & restore	The screen explains what it will do; a backup can be started	☐
2.14	Integrations & keys	Payment gateway sits at the top, separate from analytics keys	☐

3. PHASE 2 — MASTERS (the lists everything else picks from)

What was built: units, categories, colours, sizes, brands, tags, supplier types, sales channels, and the delivery masters + setup. Every master was rebuilt clean: no page prose, no field hints, errors inside the dialog, live duplicate checks.

Screens: [Setup → Sales channels](#) · [Setup → Delivery setup → Methods & slots](#) / [Setup / Riders](#) · [Items → Units, Categories, Colours, Sizes, Types](#) · [Suppliers → Settings](#) · [Brands](#) · [Tags](#).

Checklist 3A — the shape of every master (repeat for at least 4 masters)

#	STEP	EXPECTED	P/F
3.1	Open the master	A clean list. No paragraph of explanation at the top	☐
3.2	Add a row	A dialog opens; it has a Save button; nothing saves by itself	☐
3.3	Add a row with the same name again	Refused, with the message inside the dialog (not a browser popup)	☐
3.4	Save with an empty name	Refused politely	☐
3.5	Rename a row	Works; the list updates without the page jumping	☐
3.6	Delete a row that is in use	Refused, and it says what is using it	☐
3.7	Delete a row that is not used	Goes away	☐

Checklist 3B — sales channels feed the rest

#	STEP	EXPECTED	P/F
3.8	Setup → Sales channels; add "Facebook"	Saved	☐
3.9	POS → Sell (counter)	"Facebook" is offered as the sales channel	☐
3.10	Switch that channel off; re-open POS	It is gone from the till	☐

Checklist 3C — delivery

#	STEP	EXPECTED	P/F
3.11	Delivery setup → Methods & slots	Methods (2-hour, same day, midnight, courier) and slot templates exist	☐
3.12	Delivery setup → Setup	Price per zone and slot capacity are set HERE, not in the master	☐
3.13	Change a delivery price; open the storefront's delivery options	The storefront shows the new price	☐

#	STEP	EXPECTED	P/F
3.14	Delivery → Riders	Riders can be added; couriers are NOT here (they live in Administration)	☐

4. PHASE 3 PART A — ITEMS

What was built: every Items screen; item types; sub-categories; variant families as their own page; per-variant photos; **cost = purchase average**; **sell price = cost + markup**; the "See cost prices" permission; two separate switches, "We sell it" and "Sell online"; and the rule that **the counter sells Items, never Products**.

Screens: Items → All items · New item · Item page · Family · Groups · Costs · Pricing · Recipes · Types · Categories · Colours · Sizes · Units · Trash.

Checklist 4A — create an item

#	STEP	EXPECTED	P/F
4.1	Items → New item; fill name, type, unit, category	Saves; lands on the item page	☐
4.2	Inside the form, create a new category without leaving the page	Possible; the new category is selected immediately	☐
4.3	Same for brand, supplier, unit, colour, size	All can be created inline	☐
4.4	Upload a photo	Shows on the item and in every picker afterwards	☐
4.5	Set a Counter price below the price floor	The field turns red and warns	☐
4.6	Save without a name	Refused	☐

Checklist 4B — the two switches (DEC-ITM-024/025)

#	STEP	EXPECTED	P/F
4.7	Turn We sell it ON, Sell online OFF	Item appears at the POS counter, not on the website	☐
4.8	Turn Sell online ON	A Product can be made for it; it can reach the website	☐
4.9	Turn We sell it OFF	It disappears from the POS list	☐
4.10	Create an item of type Service (e.g. gift wrapping)	It is sellable by default and holds no stock	☐

Checklist 4C — variants and family

#	STEP	EXPECTED	P/F
4.11	Generate variants from colour/size (e.g. rose — Red / Pink / Green)	Each variant is its own item, grouped in one family	☐
4.12	Items → Family page	The family lists its variants; each can carry its own photo	☐

#	STEP	EXPECTED	P/F
4.13	All items list	Variants appear grouped under the family, not scattered	☐

Checklist 4D — cost and price

#	STEP	EXPECTED	P/F
4.14	Note an item's cost. Buy the same item at a very different price (see §5) and come back	Cost has moved to the weighted average, not the last price	☐
4.15	Items → Pricing; set the shop markup (e.g. 20%)	New sell prices are suggested as cost + markup	☐
4.16	Log in as a person without "See cost prices"	Cost columns are absent everywhere — item list, item page, POS	☐
4.17	Same person opens a purchase bill	No cost figures leak	☐

Checklist 4E — deleting

#	STEP	EXPECTED	P/F
4.18	Delete an item that has stock or history	Refused with the reason	☐
4.19	Delete a fresh unused item	Goes to Items → Trash, not gone forever	☐
4.20	Restore it from Trash	Comes back whole	☐

5. PHASE 3 PART B — PURCHASE AND SUPPLIERS

What was built: the whole buying circle — write a bill, receive the goods, stock lands in the right store, the item's average cost updates, money is paid in parts, goods can go back to the supplier, and the supplier's ledger reads like a bank book. Plus: **receive line by line**, the **cost-jump guard**, and the supplier's **What we buy** tab.

Screens: Purchases → Overview · All purchases · New purchase · Returns · Reports. Suppliers → Overview · All suppliers · supplier page · Vendors · Settings.

Checklist 5A — a normal purchase

#	STEP	EXPECTED	P/F
5.1	Purchases → New purchase	Clean form; supplier, date, receipt no, notes	☐
5.2	Press Add items	The photo picker opens (same as the POS), with search and type filters	☐
5.3	Add 2–3 items, set quantity and price	Line totals and the purple Grand total update instantly	☐
5.4	Open the Discount door, put Tk 44.13	Applies to the paisa — the total drops by exactly 44.13	☐
5.5	Open Charge , add "Van fare Tk 28"	Adds; the name is kept with the bill	☐
5.6	Open Adjustment , choose —, type .42	Total drops by 42 paisa (this is the paisa test)	☐
5.7	Pick a supplier from the dropdown, or type a new name	Both work; a new supplier is created on the spot	☐
5.8	Pay part of the bill (e.g. Tk 100 of Tk 160)	PAID and Still owed boxes show the split	☐
5.9	Save	Lands on the bill page; number PUR-0000xx	☐

Checklist 5B — the bill page

#	STEP	EXPECTED	P/F
5.10	Look at the right rail	Dark purple card: Payable biggest, then Subtotal / Discount / Adjustment / VAT, then green Paid and amber Due	☐
5.11	Payments card	Purple header; each payment has a coloured method chip (CASH green, bKash pink...) and a green amount	☐
5.12	Timeline card	Icon beads on a thread: purchase recorded, goods received, payments	☐
5.13	Press Add payment , pay the rest	Badge flips to Paid ; the Add payment button disappears	☐
5.14	Top of page	New purchase and Sell (counter) buttons are there	☐

Checklist 5C — receiving

#	STEP	EXPECTED	P/F
5.15	Make a purchase with Advance order — goods arrive later ticked, pay a small advance	Status ADVANCE PAID; goods NOT in stock yet	☐
5.16	Try to save an advance order with 0 paid	Refused — an advance order needs money now	☐
5.17	Press Only part of it arrived ; take 4 of 10	Stock rises by 4 only; the bill still shows 6 to come	☐
5.18	Inventory → Stock board	The item shows +4 in the receiving store	☐
5.19	Press Receive everything outstanding	The rest lands; status RECEIVED	☐
5.20	Items → the item's cost	Moved to the new weighted average	☐

Checklist 5D — the cost-jump guard

#	STEP	EXPECTED	P/F
5.21	Buy an item at more than 3x its usual cost (e.g. usual Tk 6, type Tk 30) and receive it	An amber card: "Price looks unusual — 5.3x away from the current cost (Tk 6 per Pice)"	☐
5.22	Press Never mind	Nothing is received	☐
5.23	Press The price is right — receive anyway	Received; average cost updates	☐
5.24	Repeat with a part receipt	The confirm receives only the part you typed, never the whole bill	☐

Checklist 5E — returning goods to the supplier

#	STEP	EXPECTED	P/F
5.25	On a received bill press Return goods to supplier ; return 2 units with a reason	PRT-0000xx created	☐
5.26	Stock board	Stock has dropped by 2	☐
5.27	The bill's rail	"Returned — Tk x", Payable reduced, Due reduced first	☐
5.28	Return more than was received	Refused	☐
5.29	Return when nothing is owed	The value becomes credit with the supplier , never cash back	☐

Checklist 5F — supplier page

#	STEP	EXPECTED	P/F
5.30	Suppliers → open a supplier	Four coloured tiles: Due (we owe) · Credit we hold · Bought (all time) · Purchases	☐
5.31	Ledger tab	Day headings; purchases red +, payments green –; method chips; and under each amount " owed Tk x " — the running balance	☐
5.32	Walk down the ledger	The owed line decreases exactly to the Due tile at the top	☐
5.33	What we buy tab	Every item bought from him: bills count, quantity, last price, average price , last bill number	☐
5.34	Pay supplier button	Dialog: amount, method (only methods the shop has ON), oldest bill first, "Still owed after this"	☐
5.35	Pay more than is owed	Refused	☐
5.36	Purchases → Reports	Month by month, supplier board, and Item price history (every price ever paid for one item)	☐

6. PHASE 3 PART C — INVENTORY

What was built: the stock board as photo tiles, opening stock, transfers, wastage & gift with an editable reason list and an **Analysis** tab, stocktake, movements, reports, settings — and warehouses moved to Setup.

Screens: Inventory → Overview · Stock board · Opening stock · Transfer · Wastage & Gift · Stocktake · Movements · Reports · Settings. Plus [Setup](#) → [Warehouses](#) .

Checklist 6A — stock board

#	STEP	EXPECTED	P/F
6.1	Inventory → Stock board	Photo tiles: image, IN STOCK big, per-store chips, value	☐
6.2	Press the table icon (top right)	Same data as rows; press the grid icon to go back	☐
6.3	Search by name and by SKU	Both filter	☐
6.4	Filters Low stock and Negative	Only matching tiles remain; low = amber border, negative = red	☐
6.5	Press Adjust on a tile; change the count with a reason	Stock changes; the tile updates	☐
6.6	Inventory → Movements	The adjustment is listed with reason, who and when	☐

Checklist 6B — opening stock

#	STEP	EXPECTED	P/F
6.7	Inventory → Opening stock; choose a store	Only items that have never moved in that store are offered	☐
6.8	Choose a store where everything already moves	An amber card explains why the list is empty and links to Adjust	☐
6.9	Add items through the picker, type quantities	"Lines ready" and "Worth at cost" update on the right	☐
6.10	Post	Stock appears on the board; Movements shows OPENING	☐
6.11	Try to open the same item in the same store again	It is not in the list at all	☐

Checklist 6C — transfer

#	STEP	EXPECTED	P/F
6.12	Inventory → Transfer; From = Main Storeroom	The picker offers only what that store holds	☐

#	STEP	EXPECTED	P/F
6.13	Change From = Radian Shop	The list changes to that store's goods	☐
6.14	An item that sits in both stores	Appears in both lists	☐
6.15	Ask for more than the source holds	The "In ..." column turns red with Δ , and the right panel warns	☐
6.16	Post the transfer	TRF-0000xx; source -qty, destination +qty, one entry each in Movements	☐
6.17	Stock board	Both stores' numbers match what you moved	☐

Checklist 6D — wastage & gift

#	STEP	EXPECTED	P/F
6.18	Inventory → Wastage & Gift; choose Wastage	Reason chips appear (Rotten, Dried out, ...)	☐
6.19	Hover a chip	A small pencil and × appear inside the chip	☐
6.20	Rename a reason	Renames; the list updates in place	☐
6.21	Press × once, then again	First press arms it (turns red), second deletes	☐
6.22	+ New reason → type one → Add	Added and selected immediately	☐
6.23	Add the same reason name twice	Refused	☐
6.24	Pick items — only what that store holds is offered; the "In store" column shows the count	Correct	☐
6.25	Post a wastage	WST-0000xx; stock down; Movements shows WASTAGE with the reason	☐
6.26	Switch to Gift and post one	GFT-0000xx; the reason list is the gift list, not the wastage list	☐
6.27	The month totals line	Wastage and gift totals for this month are right	☐

Checklist 6E — the Analysis tab

#	STEP	EXPECTED	P/F
6.28	Wastage & Gift → Analysis	Four tiles: Wasted · Gifted · Total lost · Entries	☐
6.29	Switch 7 / 30 / 90 days / 1 year	Every panel re-reads for that window	☐
6.30	Day by day graph	Red = wastage, pink = gift, stacked; hovering a bar shows the day and the amounts	☐

#	STEP	EXPECTED	P/F
6.31	Which item, how much	Items ordered by money lost, with photo, quantity wasted/gifted and a two-colour bar	☐
6.32	Why — reason by reason	Each reason with a WASTE/GIFT tag, how many times, how much money	☐
6.33	Month by month and Store by store	Totals split by kind	☐
6.34	Cross-check	Add the entries you posted by hand — the totals must agree	☐

Checklist 6F — stocktake (the counting day)

#	STEP	EXPECTED	P/F
6.35	Inventory → Stocktake; choose a store → Start counting	The sheet lists only what that store holds (not the whole catalogue)	☐
6.36	The sheet columns	Item · Ledger · Counted · Diff · Diff (taka)	☐
6.37	Leave a row blank	It stays "—" — blank is NOT zero	☐
6.38	Type a count lower than the ledger	Diff goes red with the money value	☐
6.39	Type one higher	Diff goes green	☐
6.40	Found something else	The picker offers items the ledger says are not in this store; adding one puts it on the sheet	☐
6.41	Save as draft	STK-0000xx appears under Sessions: "x counted · y differ", net taka. Stock has NOT changed yet	☐
6.42	Check the stock board	Unchanged — the draft only proposes	☐
6.43	Press Apply	"applied — adjustments posted"; stock board now matches your counts	☐
6.44	Movements	One ADJUSTMENT per differing line, noted "Stocktake STK-0000xx"	☐
6.45	Try to apply the same session twice	Refused — an applied session is final	☐

Checklist 6G — settings and warehouses

#	STEP	EXPECTED	P/F
6.46	Inventory → Settings	Three cards side by side: Sales leave from · Purchases land in · Assembly picks from	☐
6.47	Change "Sales leave from"	Saves; a green line explains where the rest comes from when it runs out	☐
6.48	The two switches below	"Staff pick a store per order" and "When every store is empty" (Allow-warn / Block)	☐

#	STEP	EXPECTED	P/F
6.49	Set Block , then sell more than exists at the POS	The sale is refused	☐
6.50	Set Allow, warn me , sell again	The sale goes through and the row turns red on the board	☐
6.51	"Your stores" strip → Manage in Setup	Goes to Setup → Warehouses	☐
6.52	Setup → Warehouses: close a store that holds stock	Refused, and it names what is inside	☐
6.53	Close the only open store	Refused	☐
6.54	Close a store that Settings still points at	Refused, and it says which setting	☐
6.55	Delete a store with movement history	Refused — close it instead	☐
6.56	Short code of an existing store	Cannot be changed	☐

7. SHOP-WIDE RULES (came out of Phase 3 — test these carefully)

Checklist 7A — one payment list (DEC-GBL-001)

#	STEP	EXPECTED	P/F
7.1	Setup → Payment methods	Coloured cards: Cash green, bKash pink, Nagad orange, Card blue, Bank navy, Other	☐
7.2	Switch bKash OFF	Toast "bKash is off everywhere"; the card greys	☐
7.3	POS → Sell (counter) → payment method list	bKash is gone	☐
7.4	Purchase bill → Add payment	bKash is gone	☐
7.5	Suppliers → Pay supplier	bKash is gone	☐
7.6	Returns → a refund payout	bKash is gone	☐
7.7	An old bill that was paid by bKash	Still says bKash — history is not rewritten	☐
7.8	Switch bKash back ON	It returns in all four places	☐
7.9	Try to switch off Online payment or Cash on delivery	Refused — those belong to the website	☐

Checklist 7B — accounts under a method (DEC-GBL-006)

#	STEP	EXPECTED	P/F
7.10	Payment methods → Bank → Add bank account	Dialog: Bank dropdown (39 Bangladeshi banks + Other) , account number, holder, branch, routing	☐
7.11	Save with no bank or no number	Refused	☐
7.12	Save a full one	Card shows "Bank name · ...last4 — branch · holder"	☐
7.13	bKash → add a second number	Two accounts under bKash	☐
7.14	POS or purchase → choose bKash	A second box appears: " Which account... " listing both	☐
7.15	Try to pay without choosing	Refused by the server	☐
7.16	Cash (one account only)	No extra question is asked	☐
7.17	Edit an account → Delete (two presses)	Deleted only if no money ever moved through it; otherwise refused with the reason	☐

#	STEP	EXPECTED	P/F
7.18	Switch one account OFF	It disappears from the payment screens; the method stays	☐

Checklist 7C — one VAT rate (DEC-GBL-002) and one company identity (DEC-GBL-003)

#	STEP	EXPECTED	P/F
7.19	Money → Finance → Settings; set VAT to 7.5%	Saved	☐
7.20	POS → Settings	Shows 7.5% , read-only, with a link "Set in Finance"	☐
7.21	POS bill → VAT door	Uses the shop's rate	☐
7.22	Finance → VAT challan (Mushak 6.3)	The business name/BIN/address it prints are the ones from Company settings	☐
7.23	Change the BIN on the Mushak screen; open Administration → Company settings	The same new BIN is there — one copy only	☐

Checklist 7D — paisa (money precision)

#	STEP	EXPECTED	P/F
7.24	POS: type a payment of 19.80	Stays 19.80	☐
7.25	POS: Adjustment — .42 on a Tk 1,814.42 bill	Grand total becomes Tk 1,814.00	☐
7.26	Purchase: discount 44.13	Applies exactly	☐
7.27	Due board: collect 29.80	Accepted; the due drops by 29.80	☐
7.28	Returns: refund a part-compensation of 100 on a Tk 507.5 line	The payout dialog says 100 , not 507.5	☐

8. CROSS-MODULE CIRCLES (the real proof)

Run these three from start to end without skipping.

Circle 1 — buy → sell → the books

#	STEP	EXPECTED	P/F
8.1	Buy 20 of an item at Tk 8, receive, pay in full	Stock +20, cost = weighted average	☐
8.2	Transfer 5 from the storeroom to the shop	Storeroom -5, shop +5	☐
8.3	POS: sell 2 from the shop	Shop -2; the bill lands on a counter bill page	☐
8.4	The counter bill page	Purple money rail, coloured payment rows, timeline, New purchase / Sell (counter) buttons	☐
8.5	Stock board	Numbers match every step above	☐
8.6	Inventory → Movements	PURCHASE, TRANSFER out/in, SALE — all present with the right notes	☐

Circle 2 — a customer returns something

#	STEP	EXPECTED	P/F
8.7	Returns → New return; pick the counter bill	Only delivered orders can be picked; already-returned ones are marked	☐
8.8	Tick a line; The goods: Back on the shelf / Thrown away	Small "i" on each explains it; the page carries no loose paragraphs	☐
8.9	How it is settled: Money back	The refund dialog pays what was collected, never more	☐
8.10	Complete	Stock rises again (if Back on the shelf); Movements shows SALE_RETURN	☐
8.11	Repeat with Store credit	It asks how much credit; the customer's credit balance rises	☐
8.12	Repeat with Replacement	It asks what goes out instead (same goods by default, or pick another item); on complete, the returned item comes back AND the replacement leaves stock	☐
8.13	Repeat with Keeps it, part back	Only the agreed amount is paid out	☐

Circle 3 — the counting day

#	STEP	EXPECTED	P/F
8.14	Waste 2 of an item without telling the system? (skip a step on purpose)	—	☐
8.15	Stocktake that store; count what is really there	Diff shows the missing 2 in red with the money	☐
8.16	Apply	Stock corrected; Movements records the adjustment	☐
8.17	Wastage & Gift → Analysis	The loss shows in the day graph and against the item	☐

9. THINGS THAT ARE KNOWN AND NOT BUGS

Do not raise these; they are already on the board.

1. **New order (admin)** still quotes its own delivery methods, fees and time slots instead of reading the Delivery module (DEC-GBL-005).
2. **Offers → Coupons** shows sample coupon names.
3. **Return reasons** are a separate list from the wastage/gift reasons; they will be merged later.
4. **Movements** and **Inventory → Reports** were never restyled — they work, they are simply older-looking.
5. Test rows made by the owner exist in the demo (bKash accounts named "sobuj"/"sohag", items named test 2 / test 8, a "Due test" customer).
6. Phase 4 onwards (Products, Checkout, Orders, Delivery, POS deep-dive, Finance, Growth) has **not** been tested yet — anything odd there is out of scope for this round.

10. HOW TO REPORT

One table, one row per finding:

#	SCREEN	STEPS TO REPRODUCE	EXPECTED	WHAT HAPPENED	SEVERITY	SCREENSHOT
1	Inventory → Transfer	From = Radian Shop, add rose — Red, qty 999, Post	Warning then negative	Page froze	High	shot1.png

Severity: High = money or stock is wrong, or the screen is unusable · Medium = a rule is not enforced, or the flow is confusing · Low = looks, wording, alignment.

At the end, send back: the filled checklist (P/F per line), the findings table, and one line — *"Which screen felt worst to use, and why?"*
